- Level Manager (placeholder, needs more)
- Keyboard/Mouse Player Controller
- Health Component
- Inventory Component
- Inventory Display
- Items
- State Machine
- Enemy AI (placeholder, needs more)

Teammate Contributions?

N/A

On Schedule?

Everything is on schedule at the moment. The majority of the work in the project right now was implemented over a week ago. I was extremely busy this past week and didn't work on the project. During Thanksgiving I'm looking forward to spending more time with it. The only doubts I have right now are: building out the navigation system and figuring out how to detect poses with hand tracking. Overcoming them? With time and dedication of course.
